TODAY'S TOP 3 TRADES

METALS/ENERGY (WTI CRUDE, GOLD) + TODAY'S TOP TRADE (COCOA)

WTI CRUDE (CL) WEEKLY/DAILY/4HR

WTI Crude (CL) slid nearly 1% yesterday, and looks vulnerable going into today's European morning just above the psychologically key 70 whole figure level. Significantly, CL is retesting the the weekly chart ascending wedge support, and appears increasingly likely to form a lower August high versus the July high. Any decisive break below the weekly chart ascending wedge support may occur as early as today following the US ADP Non-Farm Employment Change announced at 815am EST. Greater volatility can be expected after the highly anticipated weekly crude inventory data release at 1030am EST and Friday's highly anticipated US Non-Farm Payrolls (NFP).

Congratulations to Premium Members who benefited from the bullish triangle breakout highlighted Nov 18th. The weekly RSI, Stochastics and MACD are tiring. I am looking at entering short in the red zone (of the daily chart), targeting the green zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter). **CLICK HERE FOR ANALYSIS ON GOLD, COCOA**

Ethereum (ETHUSD) Daily MACD Negatively Crossing

Ethereum (ETHUSD) is trying to firm after yesterday's strong profit-taking brought it back below the psychologically key 4k whole figure level. Significantly, the current weekly Doji's wide range elevates the odds that ETHUSD may finally be making its major top. Although bears should not rule out the possibility of a final blow off top that sees ETHUSD rally towards 5k before finally seeing a sharp reversal, risk:reward for those establishing fresh longs at current levels is highly unfavourable. The steepness of the rally extension in the prior 2 weekly candles suggests ETHUSD could quickly slide back into the upchannel (on the weekly chart). ETHUSD's correlation to BTCUSD (on a weekly chart) continues trending lower, and is at the lowest level since November 2019. Congratulations to longer term bulls who remained long ETHUSD or initiated ETHUSD longs after the March 2020 crash, with bullish developments profiled in the [March 29th, 2020 analysis](#) and increasing upwards momentum cited [April 26th, 2020](#). I am have re-initiated a small short at 3800 and am looking to add to the short in the 3900-4200 range, tentatively targeting the 3000-3500 range for the next few weeks. Except for the weekly MACD which still slopes up, the weekly and daily RSI, Stochastics and MACD are tiring or turning down.

Robusta Coffee (RC) Weekly/Daily/4hr

Robusta Coffee (RC) consolidated again yesterday, forming a 2nd daily Doji/Gravestone and advancing in the weekly Gravestone just above the March low. Significantly, RC will need to close on a weekly basis above the 50% Fib retrace of the July to September rally to all but halt the massive slide since late February. Before bulls get excited though, they'll want to see a daily close above prior triangle resistance (on the daily chart) which will dramatically increase the odds of a test of triangle resistance (on the weekly chart) in the several days after. The odds for a retest this week of the 2021 low coinciding with the psychologically key 1300 whole figure level is moderately low. The weekly and daily RSI, Stochastics and MACD are mostly bottomish. I am long as of yesterday at 1345, although if I were flat, I'd look to enter long in the green zone of the daily chart (in the ~1315-1340 range), targeting the red zone (of the daily chart in the ~1375-1400 range) for Tuesday. The amber/yellow zone (in the ~1280-1310 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Robusta Coffee (RC) Weekly/Daily/4hr

Get your coffee today? You can now enjoy your brew with Coffee Daily - Tradable Patterns' Arabica and Robusta Coffee Futures technical analysis newsletter, published Monday to Friday before the London open. Write to info@tradablepatterns.com for pricing details and sample reports as of the July 13 launch, illustrating how the massive moves since were hinted through pattern recognition.

Natural Gas (NG) Breaking 2 Month Downchannel Resistance

Natural Gas (NG) is consolidating after yesterday's US morning surge above triangle resistance (on the daily chart). Significantly, NG has broken above the weekly chart downchannel resistance, dramatically increasing the likelihood of a retest of the 50% Fib retrace of the slide from late February the balance of this month. Although volatility can be expected following Thursday's highly anticipated weekly storage data, any post-data dip is unlikely to retest last week's low. **Congratulations to Premium Members who profited from the opportunities highlighted April 1st, April 17th and reiterated Aug 3rd before the day's historic gains.** The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking at entering long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Today's Top 3 Trades offers technical analysis on a subset of 3 CME/ICE commodity/index futures or spot FX markets (with coverage for 2 markets from a designated asset class(es) for each weekday as seen in the Watchlist), plus the top trade idea for the day from any asset class. All 3 markets covered are selected based on their likelihood to exhibit trend reversal or continuation during the week that begins on the day of coverage, based on technical analysis and news flow. For instance, Monday coverage is on 2 Agris (and potentially 1 Index), while Tuesdays are devoted to 2 Indices (and potentially 1 Soft).

For less experienced traders, **tutorials and workshops** are offered online and throughout Southeast Asia.

Tradable Patterns content does not constitute an advisory and does not make recommendations, but can supplement your own analysis. Please do your own due diligence ahead of any trades.
