NRMP Specialties Matching Service: Program Results for 2024 Appointments	100

About the Specialties Matching Service®

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank-ordered choices of applicants and graduate medical education program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and program directors' preferences for each other.

The NRMP Specialties Matching Service® (SMS®) conducts Matches for advanced residency and fellowship positions. The first Fellowship Match was conducted in 1984 for Colon and Rectal Surgery; for the 2024 appointment year the SMS provided services for 77 subspecialties in 22 separate Matches. Two subspecialties joined the SMS for 2024 appointments as part of the Epilepsy and Clinical Neurophysiology Match: Clinical Neurophysiology and Epilepsy. Forensic Pathology also joined the Match for 2024 appointments as a single-specialty Match while Cancer Rehabilitation joined as part of the Rehabilitation Medicine Match.

A complete list of the subspecialties participating in the SMS for the 2024 appointment year is shown in Figure 1.

Fellowship Matches occur throughout the year, and each requires its own registration process with the NRMP. Fellowship positions generally begin in July. Because Fellowship Match appointments may begin anywhere from 6 to 14 months after their Match Days, data are reported for the appointment year instead of the Match year.

Introduction

This report summarizes all Fellowship Matches conducted by the NRMP Specialties Matching Service® (SMS®). Data are reported for Matches conducted in 2023 and early 2024 for appointments beginning in July 2024. Graphs display five-year trend data by subspecialty for the numbers of programs, positions, and applicants as well as match rates. Numbers of positions offered and filled for each participating program are listed at the end of this report.

The 2024 report includes four new subspecialties: Cancer Rehabilitation, Clinical Neurophysiology, Epilepsy, and Forensic Pathology.

The 2024 appointment year was the largest in the history of the SMS. The Matches encompassed:

- 6,116 programs that submitted certified rank order lists in 77 subspecialties and offered 14,169 fellowship positions, of which 11,853 (83.7%) were filled

- Of the 6,116 participating programs, 4,579 (74.9%) filled all positions when the matching algorithm was processed
- 14,034 active applicants participated in at least one Fellowship Match, of whom 11,853 (84.5%) obtained positions

Numbers of applicants, matched applicants, positions, and programs offering positions between 1993 and 2024 are shown in Figure 2 below.

Table 1

Table 1 provides a summary of the SMS® Fellowship Matches for appointment year 2024.

Using Allergy and Immunology as an example:

- The first two columns (“No. of Applicants”) show that 143 U.S. MD medical school graduates and 242 total applicants ranked at least one Allergy and Immunology program.
- The next two columns (“Positions Offered” and “No. of Pgms”) show that a total of 169 positions were offered by 98 Allergy and Immunology programs.
- The “No. of Matches” columns show that of the 169 positions offered in Allergy and Immunology, 113 were filled by U.S. MD graduates, and 168 were filled overall.
- The percentages of positions filled (calculated as “No. of Matches” divided by “Positions Offered”) can be found in the “% Filled” columns. Of the fellowship positions offered in Allergy and Immunology, 66.9 percent were filled by U.S. MD graduates and 99.4 percent were filled overall.
- The “Ranked Positions” columns show that the 98 Allergy and Immunology programs were ranked 1,368 times by U.S. MD graduates and 1,963 times by all applicants (including U.S. MD graduates).
- The last column (“Unfilled Programs”) indicates that 1 Allergy and Immunology program had at least 1 unfilled position after the matching algorithm had been processed.

Of the 77 participating subspecialties, 29 filled 90 percent or more of the positions offered and 30 filled less than 75 percent, including 5 subspecialties that filled less than 50 percent of their positions.

Table 3

The ratios of fellowship positions to active applicants are provided in Table 3 for appointment years 2020 through 2024 and are shown graphically in Figure 3 for appointment years between 2002 and 2024. Active applicants are defined as those who submit certified rank order lists of programs. The red line in Figure 3 indicates the point at which there are equal numbers of positions and applicants.

- The number of fellowship positions per *active U.S. MD graduate* was 1.94 in 2024, 0.11 more than last year.
- The ratio of fellowship positions to *all active applicants* was 1.01 for the 2024 appointment year, 0.05 more than last year.

Table 4

Table 4 displays applicants by applicant type in the SMS® Fellowship Matches between 2020 and 2024.

Applicants are grouped based on citizenship and medical school of graduation. For example, *graduates of U.S. MD medical schools* are graduates of U.S. MD medical schools regardless of citizenship, and *U.S. citizen graduates of international medical schools* are U.S. citizens who are graduates of international medical schools.

The total number of registrants for the 2024 appointment year was 14,484, an increase of 99 over 2023. The most substantial contributor to that increase was the growth in the number of U.S. DO graduates (62). There were also increases in the numbers of U.S. citizen (15) and Non-U.S. citizen graduates of international medical schools (20). The number of U.S. MD graduates decreased (2) from the year prior for the first time since 2011.

An *active applicant* is one who submits a certified rank order list of programs. Between 2020 and 2024, the number of active applicants rose 16.5 percent from 12,042 to 14,034. During the same time period, U.S. MD graduates had the largest increase in number (835) followed by U.S. DO graduates (602). Compared with 2023 appointment year, the total number of active applicants who were U.S. MD graduates increased by 6 (0.1%) while the number of U.S. DO graduates increased by 51 (2.4%). The number of U.S. citizen graduates of international medical schools increased by 11 (0.6%) while the number of non-U.S. graduates of international medical schools who were active applicants increased by 35 (1.3%).

For the 2024 appointment year, 11,853 active applicants matched to a fellowship position, 305 more over 2023. The number of matched applicants among U.S. MD graduates was 6,667, an increase of 110 over the 2023 appointment year. Among U.S. DO graduates, 1,807 matched, an increase of 69 from 2023. The number of matched U.S. citizen graduates of international medical schools was 1,262, an increase of 43 from 2023. The number who matched among non-U.S. citizen graduates of international medical schools was 2,062, an increase of 70 from 2023.

The trends in the numbers of active applicants and their match rates are shown graphically in Figure 4.

Numbers of Active Applicants and Percentages Matched by Applicant Type, 2020 - 2024

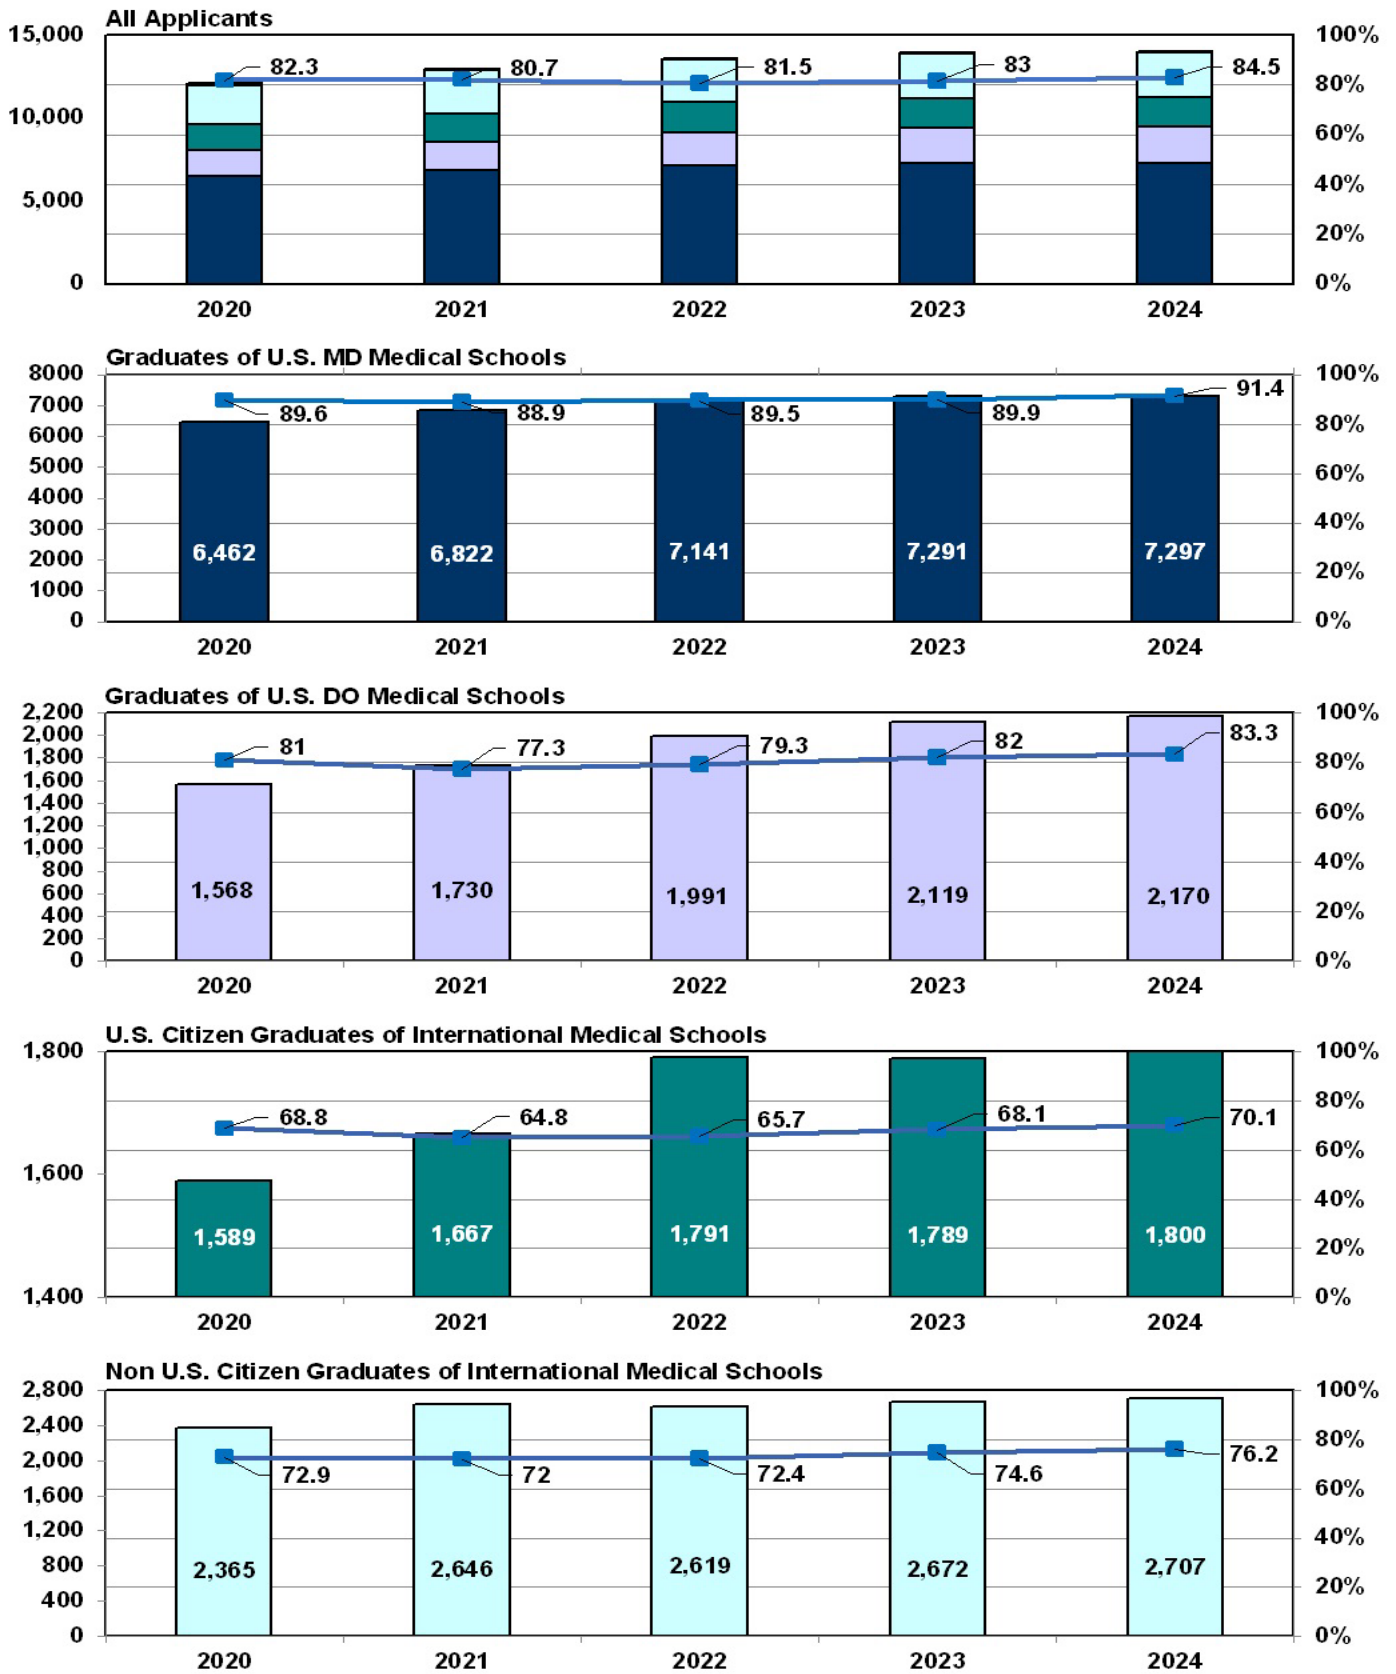

Table 5

Table 5 displays Fellowship Match results by subspecialty overall as well as applicants' preferred subspecialty. *Rank choice* is determined by the placement of programs on an applicant's rank order list. *Preferred specialty* is the subspecialty of the program ranked first on the applicant's rank order list.

For single specialty Matches (top half of the table), the data presentation and interpretation are straightforward; the preferred specialty is the single specialty so "Preferred Specialty" and "Matched in Another Specialty" columns reflect "n/a". Data for combined specialties Matches (bottom half of table) require more explanation.

Single Specialty Matches

Using Laryngology as an example, 25 of the 32 applicants who ranked the subspecialty matched. Of those 25 matched applicants, 12 (48.0%) matched to the Laryngology program listed first on their rank order list, 2 (8.0%) matched to their second choice, 2 (8.0%) matched to their third choice, and 9 (36.0%) to a choice lower than third. Seven applicants who ranked Laryngology did not match, representing 21.9 percent of the total.

Combined Specialties Matches

In examining unique applicants for the combined specialties Matches, each applicant is included in the counts for the subspecialty ranked first on the rank order list (preferred specialty). Because applicants can rank more than one subspecialty within the same Match, "Matched in Another Specialty" data also are provided.

Using Addiction Medicine as an example, of the 158 applicants who ranked Addiction Medicine, 146 preferred it by ranking it first. Overall, 138 applicants matched to Addiction Medicine, and of those, 135 listed it as their preferred specialty.

Of the 158 applicants who ranked Addiction Medicine, 101 (63.9%) matched to the program that was listed first on the rank order list, 21 (13.3%) matched to the second choice, 7 (4.4%) to the third choice, 9 (5.7%) to a choice lower than third. There was one applicant (0.6%) who ranked Addiction Medicine and at least one other subspecialty who matched to another subspecialty.

Of the 158 applicants who ranked Addiction Medicine, 13 (8.2%) did not match.

* In most cases specialties are grouped by the ACGME Review Committees (RCs). Some specialties are under the auspices of multiple RCs. For 2024 appointments, the specialties under the auspices of multiple RCs are:

- Addiction Medicine
- Brain Injury Medicine: Neurology and Physical Medicine & Rehabilitation
- Female Pelvic Medicine and Reconstructive Surgery: Urology and OB/GYN
- Geriatric Medicine: Family Medicine and Internal Medicine
- Hand Surgery: Orthopaedic Surgery, Surgery, and Plastic Surgery
- Medical Toxicology: Emergency Medicine and Preventive Medicine
- Pediatric Emergency Medicine: Pediatrics and Emergency Medicine
- Sleep Medicine: Internal Medicine, Neurology, Pediatrics, and Psychiatry
- Sports Medicine: Emergency Medicine, Family Medicine, Pediatrics, and Physical Medicine & Rehabilitation

** Not accredited by the ACGME

*** Some specialties have programs within the specialty that are not accredited by the ACGME. For 2024 appointments, those specialties include:

- Complex Family Planning
- Musculoskeletal Radiology
- Pediatric Surgery
- Surgical Oncology

+ Applicants can rank multiple specialties within the combined specialties Matches. In addition, a small number of applicants participate in more than one Fellowship Match within a single appointment year, but they cannot match to concurrent year positions.

Table 6

Table 6 displays the numbers of positions offered by subspecialty as well as the percentages filled by U.S. MD graduates and all applicants for appointment years 2020 through 2024. **To provide a complete picture, the table includes all subspecialties that participated during the five-year period regardless of when they joined and whether they remained in the SMS®;** years for which data cells are blank indicate either that the program had not yet joined or that it had left the SMS. The data in Table 6 are calculated as percentages of positions filled by applicant type, whereas the data in Table 2 are calculated as percentages of matches by applicant type.

A graphical summary of the data for each subspecialty listed in Table 6 can be found on the following pages.

This section of the report lists every institution that participated in the SMS® along with the number of positions offered and filled for each of the institution's programs.

Institutions are arranged alphabetically within the state. The listing includes the institution name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match. There are also three reasons why applicants may not have matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the Match.

NRMP Program Code Structure

The NRMP program code is a **9-11 character** code consisting of the following components:

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty (see below).
- The eighth character represents the program type: F - Fellowship program, S - Fellowship Subspecialty
- Characters 9-11 represent the track number:
 - 0 - first program/track in the specialty and program type at the institution
 - 1 - second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 - third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).
